Re: Technology based Financial Inclusion Solution Project

Addendum to Request for Proposal (RFP) dated 24th May 2008

The bank had released a Request For Proposal (RFP) dated 24.05.2008, for the Technology based Financial Inclusion Solution Project, which is available on the bank's website www.ucobank.com. The last date for submission of Technical Bid has been fixed as 4th July 2008.

The following clarifications are given in respect of the solution requirements of the bank which would form part of the bank's RFP document under reference: -

Sl.No	RFP Clause No	Clarification
1	2.1.3.	The hand-held device proposed to be deployed under the solution offered to the bank may work under any chosen network like GPRS/CDMA/PSTN etc. However, the network architecture proposed by any bidder must not be a contentious issue for selection of the successful bidder by the bank based on the lowest quote by the L1 bidder.
2	2.1.11	If smart-card based solution is proposed, it should be possible to use either contact-based or contactless-card for authentication purpose
3	2.1.16	The Smart Cards must be atleast 3DES enabled.
4	2.1.21	To start with the Pilot Project, the Intermediary System - including all necessary hardware/software/host-interface to bank's back-end CBS etc.- must be provided/hosted by the selected bidder at their own site. However, bank reserves its right to host the Intermediary System later on at its own site.
5	2.3.8	The hand-held device must have a memory capacity of <u>minimum 64 MB.</u>
6	2.3.8	The hand-held device must have a battery backup capacity of <u>minimum 6 hours.</u>

All interested bidders are requested to kindly take note of the above clarifications before submission of their technical bids.
